

Synmar Coolant Organic -26 LL | S500002 V06092022

Description

The Synmar Coolant Organic -26 LL is a long-life OAT (Organic Acid Technology) silicate-free coolant. This very high quality coolant has been specially developed for protection of non-ferrous metals such as aluminium and magnesium. The Synmar Coolant Organic -26 LL contains no nitrites, amines, phosphates, borates, silicates and no other mineral additives and is suitable for both petrol and diesel engines. This premium coolant is your choice for where amongst other VW TL-774 F (G12+) VW TL-774 D (G12) or Renault Type D specifications are required.

Application

The Synmar Coolant Organic -26 LL should NOT be further diluted with water. This pre-diluted cooling fluid contains additives, protecting against corrosion and foam-building. It is completely safe for rubbers, plastics, metals, aluminium and alloys and provides a permanent, guaranteed protection against freezing up to -26°C. The Synmar Coolant Organic -26 LL is an extended life antifreeze which should be replaced every five years or every 250,000 km for passenger vehicles or every 1,000,000 km for trucks and commercial vehicles. Original Equipment Manufacturers' (OEMs) recommendations should be followed when replacing coolant.

Performance Level

VW: TL 774F/D (G12+)
MAN: 324 Typ SNF
Volvo VCS
DAF 74002
Renault Type D

Typicals

Density at 20 °C kg/l	1,119g/cm ³
Color	Red
Freezing point	-26 °C
Flash point	172 °C
