

Synmar Coolant G11-Alu -36 | S500011 V28112022

Description

The Synmar Coolant G11-Alu -36 is an ethylene glycolbased coolant for optimal performance for light or heavy duty engine applications. It is free from nitrites, amines and phosphates (NAP free), includes organic additives in combination with borate and silicate which have excellent protection resulting in effective engine cooling, outstanding anti-corrosion protection and excellent antifoaming characteristics and a frost protection up to -36°C

Application

The Synmar Coolant G11-Alu -36 should not be further diluted with water. Based on ethylene glycol and formulated according to European car manufacturers instructions, the pre-diluted cooling fluid contains additives, protecting against corrosion and foam-building. It is completely safe for rubbers, plastics, metals, aluminium and alloys and provides a permanent, guaranteed protection against freezing up to -36°C.

Performance Level

VW TL-774C (G11)
BMW GS 94000
ASTM D3306 / D4656 / D4985
BS: 6580
MB 326.2/326.0
OPEL: B040/0240
FIAT: 9.55523

Typicals

Color	Green
Density at 20 °C	1,129g/cm ³
Boiling point	170°C
Freezing point	-36 °C
