

SYNMAR SCREENWASH CONCENTRATE V20012023

Description

Synmar Screenwash Concentrate is a powerful, ethanol-based antifreeze additive to supplement the screenwash. The product cleans grime and insects from the windscreen. By supplementing the screenwash with special additives, the windscreen does not refreeze and the windscreen washer jets do not freeze over.

Application

Synmar Screenwash Concentrate can be added to the water in the windscreen washer tank. By adding it in different proportions, a high degree of protection against freezing is achieved. The product is less harmful to the environment than windscreen washer fluids based on Methanol or IPA and less harmful in contact with the skin.

Mixture

Pure	-50°C
1 : 1	-20°C
1 : 2	-12°C
1 : 3	-8°C
