

SYNMAR PENETRATING OIL SPRAY | S700006

Description

The Synmar Penetrating oil Spray is a colourless transparent formula which loosens rusted bolts, nuts, screws, locks and hinges. It lubricates and protects, penetrates easily corroded, rusted, and frozen parts, i.e., pipe fittings, nuts/bolts, valves, locks, zippers, and tools. Furthermore it flows quickly between rusted and corroded parts to break the bond of oxidized metal. The Synmar Penetrating oil Spray dissolves rust, displaces moisture is rust preventing / anti corrosion and non-aggressive to most materials. Leaving a protective film.

Application

The Synmar Penetrating Oil Spray is to free rusted or frozen nuts, bolts, screws, fittings and other fasteners as well as metal components in automotive and industrial equipment. Cleaning parts before lubrication and as a light lubricant and rust inhibitor. Or for loosening tar, grease, dirt and other carbon deposits.
