

## SYNMAR THOR COPPER | S90003

### Description

Synmar Thor Copper is a high temperature anti-seize lubricant containing copper. It is designed to control pitting, rusting, thread distortion and seizure due to corrosion and chemical attack.

### Application

Synmar Thor Copper can be applied at:

- Applications subject to high friction
- Bolts
- Exhaust assemblies
- Gaskets
- Pipe fittings
- Spark plug threads
- Threaded connections
- Wheel nuts

### Performance level

Synmar Thor Copper offers the following benefits;

- Helps prevent fretting corrosion, cavitations and etching
- Wide service temperature range: -20°C up to +1100°C
- Reduces wear on places with high friction
- Will not be affected by acids, alkalines or salts
- Suitable for a wide range of applications
