

RENEWED

BAG IN BOX

We are proud to announce that the Synmar Bag in Box has been given a new and modern look. Not only is the Synmar Bag in Box now available in a full color packaging, a more convenient box size makes it more efficient to transport.

The Synmar Bag in Box concept is a sustainable and user-friendly alternative for the conventional 20 liter jerrycan.

The Bag in Box is a packaging type that consists of a very sturdy plastic bag with faucet, packed in a fully recyclable solid cardboard box. By using the accompanying jugs, you can quickly and easily dispense the desired amount without spilling and keeping everything neat and clean. Once the box is empty, the outside cardboard box and the inner plastic bag can be easily separated from each other and disposed.

Environmentally friendly.
Outer box = 100% recyclable
and plastic inner bag has a low
waste volume

Easy to handle and very
efficient to stack

Specialy designed inner
bag to minimize residual fluid

Reducing CO₂ emissions

Oil rack is suitable for 8 x 20L
+ 8 matching Synmar jugs

Comfortable and ergonomic
way of working

Strong and easy to assemble
coated framework

Integrated drip trays ensure
a clean working environment

To prevent contamination, coding labels
are available so it is easy to see which
jug belongs to which liquid
