

SYNMAR ALEXIUS IX | S300008

V25-2503

Description

Synmar Alexius IX is an high-end fully synthetic oil, especially designed for the latest generation 9-speed automatic transmissions. Formulated from high quality base oils and additives, it provides a very good protection against corrosion and excellent friction characteristics ensuring the transmission to perform at its best.

Application

Due to tailored additives, the Synmar Alexius IX offers a significant reduction of fuel consumption, CO2 emission and protection across the entire drain interval. Offering excellent resistance against oxidation, corrosion and foam formation, resulting in a constant high performance during its lifetime wear, keeping the transmission performing at its best. This automatic transmission fluid is widely applicable for the most common European and Asian market OEM specifications
