

SYNMAR AGRI UTTO - WB102 | S400605

Description

Synmar AGRI UTTO is a versatile tractor oil formulated from high-quality base stocks combined with a quality performance additive system. This oil has been developed for use in transmission, differential, hydraulic and oil immersed brakes in agricultural vehicles and off-road equipment. Synmar AGRI UTTO is a lower viscosity tractor fluid designed for service in equipment requiring these characteristics.

- Provides smooth and quiet brake operation.
- Gives reliable operation in a wide range of equipment.
- Wide operating temperature range.
- Excellent low temperature fluidity.

Application

Synmar AGRI UTTO is suitable for applications in transmissions, wet brakes and hydraulic systems in tractors and other off-road ancillary equipment.
