

Synmar Coolant Standard -26 | S500000 V30082022

Description

Synmar Coolant Standard -26 Standard can be used throughout the whole year in the cooling systems of petrol and diesel engines including those constructed from aluminium alloys. The Synmar Coolant Standard -26 is based on mono ethylene glycol, containing no nitrites, amines or phosphates (NAP free) and is an recommended antifreeze for general purpose light duty automotive applications.

Application

Synmar Coolant Standard -26 prevents obstructive calcification, corrosion, foaming, sludge and leakage. The product is non-iron, amine and phosphate-free and should not be further diluted with water. This pre-diluted cooling fluid contains additives, protecting against corrosion and foam-building. It is completely safe for rubbers, plastics, metals, aluminium and alloys and provides a permanent, guaranteed protection against freezing up to -26°C. Original Equipment Manufacturers' (OEMs) recommendations should be followed when replacing coolant.

Performance level

ASTM D3306
BS 6580
SAE J 1034
AFNOR NF R15-601

Typicals

Color	Blue
Density at 20°C	1,064kg/m ³
Flash point	169°C
Frost protection	-26°C
