

SYNMAR COOLANT LOW TOXIC - MPG 50% | S500013 V23-1904

Description

The Synmar Coolant Low Toxic - MPG 50% is an environmentally friendly low-toxic coolant which is based on mono propylene glycol and is suitable for both petrol and diesel engines. The product is free from nitrites, amines, phosphates, borates, silicates and contains no other mineral additives. The Synmar Coolant Low Toxic - MPG 50% is also well suited for all cooling or heat transfer systems such as solar power installations, central heating circuits with water circulation and air conditioning. This product is completely safe for rubbers, plastics, metals and aluminium or alloys and has a frost protection up to -32°C.

Application

The Synmar Coolant Low Toxic - MPG 50% should not be further diluted with water. Based on mono propylene glycol and formulated according to European car manufacturers instructions, the pre-diluted cooling fluid contains additives, protecting against corrosion and foam-building. It is completely safe for rubbers, plastics, metals, aluminium and alloys and provides a permanent, guaranteed protection against freezing up to -32°C.

Performance Level

ASTM: D3306
BS: 6580

Typicals

Color	Blank
Density at 20 °C	1,050g/m ³
Boiling point	165°C
Freezing point	-32 °C

The analytical data in this product data sheet are typical values. Small deviations, which may occur during the normal manufacturing process of the product, will not affect the quality of the product. Although this overview is composed with the most possible care, Synmar does not accept any liability for damages caused by incompleteness and/or inaccuracies in this information, especially when these are caused by obvious typing errors.
