

SYNMAR SCREENWASH READY TO USE -20 | S500501 V24-0405

Description

Synmar Screenwash Ready to Use is a high quality screenwash, ready for use with excellent cleaning capabilities and a pleasant odour. The antifreeze formula prevents the reservoir from freezing and provides frost protection down to -20°C. It leaves no streaks and prevents frosting of windows. By supplementing the screenwash with special additives, the windscreen does not refreeze and the windscreen washer jets do not freeze over.

Product features:

- Excellent cleaning performance
- Formulated to effectively remove insect smears, salt and traffic film
- Pleasant fresh citrus fragrance
- Safe for wiper blades and rubber seals
- Ethanol based formulation

Application

Synmar Screenwash Ready to Use is already diluted with water and can therefore be used directly during the colder months of the year by simply adding it to your windshield washer tank. The product is less harmful to the environment than windscreen washer fluids based on Methanol or IPA and less harmful in contact with the skin.

Typicals

Appearance	Blue
Odour	Citrus fresh
Freezing point	-20°C

The analytical data in this product data sheet are typical values. Small deviations, which may occur during the normal manufacturing process of the product, will not affect the quality of the product. Although this overview is composed with the most possible care, Synmar does not accept any liability for damages caused by incompleteness and/or inaccuracies in this information, especially when these are caused by obvious typing errors.
